

# MAKING THE GOSPELS ANTI-SEMITIC

## WHY IS THE ADL TARGETING THE PASSION OF THE CHRIST?

BY RACHEL ANN HAART

Anti-Semitism is a serious issue *when* it exists. The ADL continues to use this characterization to discredit people with opinions, research or facts contrary to their agendas on politics, human rights and Zionism. Numerous lawsuits have been won against the ADL in recent years for its infringement on the constitutional rights of Americans including spying, denial of civil liberties and defamation of character.

Torah Faithful Jewry denounces Zionism. Zionism is a political movement based on racial supremacy and the Talmudic laws created after the birth of Christ to dissuade converts to Christianity and control those of the Jewish faith through the Rabbinical. This is where *The Passion of the Christ* comes in.

Many Christians embrace the ADL's agenda, protecting Zionism and worshipping Israel first, placing it before their faith and before America. The largest group Evangelical Christians, constitute the driving force in the United States. For anyone who has read the Talmud given its teachings concerning Christians, this alliance defies logic. *The Passion of the Christ* threatens to destroy this alliance by motivating Christians to fully embrace their faith. If the alliance is destroyed, Zionism loses its underwriter and protector.

The ADL and its supporters fan the flames of anti-Semitism for their own agenda to keep the truth about Zionism from reaching their American underwriters and to terrorize Torah Faithful Jewry into moving to Israel, which they refuse to do. It is against Judaism, their religion to take land by force. Fastidiously committed to their faith they field labels of "Self-hating Jew", personal attacks and threats the Zionists execute on them. Their faith is in God, not real estate. It is HIS strength that allows the Torah faithful to uphold their faith and repel Zionism.

Zionism's fear of this movie is in the reaction. Upon seeing it Christians who support the ADL and its agenda may re-read John 3:16, Acts 15 or Revelations 2:8-10. Their eyes might open and suddenly the killing they call "justified", in the context of the teachings of Jesus becomes a mortal sin instituted by Pharisees. It may cause Christians to realize Galatians outlines the new covenant, and for Christians, God's promise of a messiah has been fulfilled. Christians may re-examine their behavior, faith and actions thus convincing Christians to behave like Christians and abandon Zionism. Practicing Christians cannot support genocide, persecution, or racism against any people. It is against the religion.

If Christians, the primary supporters of Zionism grasp that to be committed to their faith forbids these policies, everything falls apart. If this happens, Zionism, not the state of Israel, will deteriorate without the unconditional support of America. Israel will have to come to terms with its neighbors and learn to live in peace without racial supremacy and apartheid. With the end of apartheid, Israel can achieve its goal of democracy and the peace that existed for over 1000 years

in the region between Jews and Gentiles can return. The entire world wins when this happens, but Zionists lose everything and those in power do not like to give it up.

The fear of losing the Evangelical benefactors is the reason groups like the ADL are attempting to discredit *The Passion of the Christ*, not that it will breed anti-Semitism. A ridiculous argument when you consider the tenants of Christianity; this movie will strengthen the faith, not weaken it. The last incidents, two in fact of anti-Semitism related to *The Passion Plays*...occurred in the 16th Century, 500 years ago. Yes, we did look it up.

Christianity teaches love the person, hate the sin. Yes, more Christians will start asking questions about Christianity and Judaism after seeing this movie. Yes Christians will be re-examining their lives, priorities and commitment to faith. Yes, they will be looking closely. Christians faithful to the New Testament cannot be anti-Semitic and still be Christian.

Today those who oppose Zionism are called anti-Semitic or self-hating Jews for refusing to sell their souls to fascism. By reacquainting themselves with the foundations of Christianity, Christians re-discover the strength faith emboldens one with to stand up for what is right and human, as the Torah Faithful Jews have done by denouncing Zionism and practicing Judaism absent of fascism and compromised beliefs.

*This* is why the ADL is attempting to discredit *The Passion of the Christ*: 10 Million dollars a day, the freedom to continue apartheid unchecked and blessed by the US taxpayers and the power to dominate and destroy an entire race without repercussion. Without the Evangelical Christians support for these policies, the money train and political clout dry up. Zionism will have to come to terms with its actions and the consequences it will face in the World Court for multiple charges of War Crimes and Crimes Against Humanity. That's a high price, a very high price to pay for a Christian epiphany.

The argument that the film will generate anti-Semitism is smoke and mirrors. The argument that it may provide the catalyst needed to expose Zionism for what it is, this is true. And as the Bible teaches, the truth will set US and Israel free.

\*Israel receives **40% of the entire foreign aid budget** each year from the US, a minimum of \$350 Billion per year, From 1973-2002, Israel, a country of just 6 million people has cost the United States \$1.6 trillion. If divided by today's population, that is more than \$5,700 per American taxpayer---. [Christian Science Monitor](#).
